- ID : 39m(2tanks), 33m(3tanks), 25m(4tanks), 23m(3tanks), 26m(1tank), 19m(1tank)
- Installation & Operating : Nov. 01, 2018

As the largest bulk liquid storage facility in the Ulsan industrial complex, Jeongil Stolthaven Ulsan tank terminal is embarking on more growth to handle greater demand for petrol and petrol product storage

Jeongil Stolthaven Ulsan is a crucial facility in Stolthaven's network as it enables domestic and regional distribution throughout the North Asia Pacific region.

The terminal is part of Stolt-Nielsen's integrated transportation and storage network in Asia Pacific for bulk-liquid chemicals and other products.

"By effectively leveraging these fully integrated assets, customers can significantly improve the efficiency of their global supply chains."
