

World Bridge Industrial Co., Ltd. is awarded contract a big project currently finished on July 2015. It is STAR Refinery Project in Izmir, Turkey, one of the three largest city in Turkey, and the second largest port city.

PROJECTS
Star Refinery
(Turkey)

03

**Full contact type IFR
(Honeycomb panel)**

This project, constructed and invested by SOCAR, national oil company of Azerbaijan, is one of the largest oil refinery project in Turkey is moving on by EPCs such as GS E&C of Korea, TR of Spain and Saipem of Italy, and the entire oil storage capacity shall be 1,640,000m³.

World Bridge Industrial Co., Ltd. is contract awarded 10 aluminum dome roofs(ADR) and 27 internal floating roofs(IFR) from Indian Oil Taking company, a tank builder of India and specially honey comb full contact type technology of IFR is applied spot lighted worldwide with new technology to protect accident by oil vaporization prevention, fire protection by such as fundamental creation protection in the vapor zone in the tanks.

And this is a heroic deed that World Bridge recognized by technology of floating roof in the world market, this is a foundation to supply for the Burgan Project of South Africa in 2016 and other storage plant project of world majors.

And this respective new technology is getting to settle down in terms of base technology worldwide IFR market by excellent safety and swift installation methods. World Bridge is one of the rare company in the world who have respective technology and experience record, and to expect to increase contract amount for the more items for the future.
